

## Charter

The Green IT Chapter aims to raise awareness in the industry in adopting environmentally conscious best practices. It seeks the conscientious efforts from member organizations and stakeholders to spearhead/drive green efforts.

Through green initiatives and programs, the chapter serves member organizations by creating a platform to nurture innovative business opportunities.

## Objectives of Chapter:

To position members for opportunities in Green IT technology & service

To raise the level of understanding of Climate Change and Sustainability in general, and in Green IT in particular, through educational sessions and activities

To collaborate with industry organizations and standards committees on Green IT standards and certification
